FINN-POWER hydraulic crimping presses - marking jaws

Sleeve marking with marking jaws for FINN-POWER presses takes place during the clamping of the fitting. The marking segment of the jaws has a groove for inscription of 10 to 16 characters with a height of 2 or 3 mm, depending on the size of the jaw. The inscription fonts are locked with a locking screw. Two-line marking is possible using two marking segments in the jaw set. The marking jaws are offered as a marking jaw set (7 regular segments and 1 marking segment) or as individual marking segments. The inserts and locking screws are parts of the marking segment. The marking fonts can contain letters (A-Z), numbers (0-9) or other characters (-, /, .). Block lettering with a width of several characters as well as company logos is possible.

Regular jaws	Marking jaws	Single segment marking segment	L [mm]	Number of characters per segment	Character height [mm]	Inset	Marking font A-Z or 0-9	Space bar
